

XLS 209 MULTI-FUNCTIONAL LABELING SYSTEM

Industrial labeling system for applying particularly wide labels

MULTI-FUNCTIONAL INDUSTRIAL LABELING SYSTEM

The XLS 209 completes our successful XLS 2xx labeler range and enables the application of extremely large labels with a width of up to 229 mm to products, canisters, cans and barrels up to bulk containers and pallets.

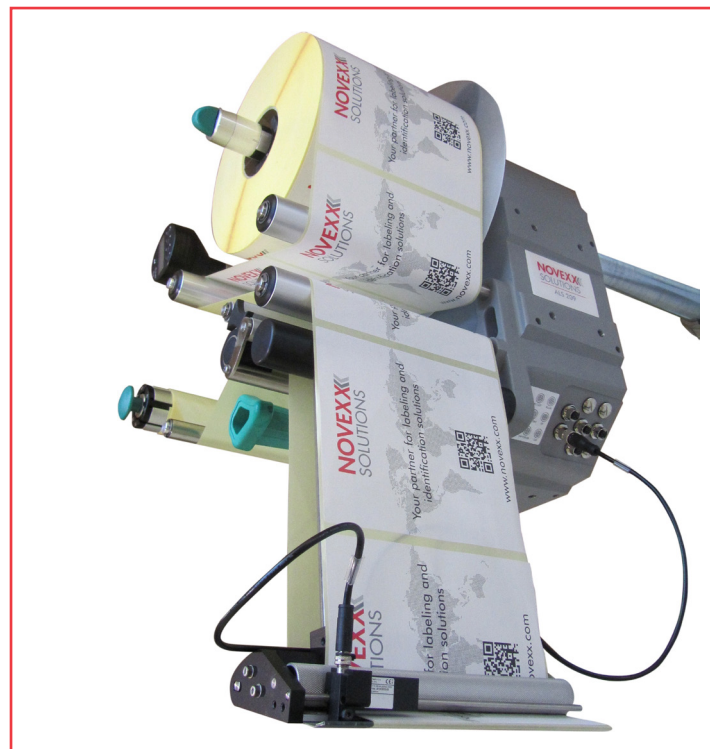

Combined with the benefits of the XLS 2xx series – high performance, modular concept and robustness – the XLS 209 is the ideal solution for typical industries using particularly wide labels, such as chemicals, personal care and building materials.

KEY FEATURES OF THE XLS 209 LABELER

- Extreme robustness for industrial environments
- IP65 kits for use in humid and dusty environments available
- Tandem application possible to ensure a maximized production line uptime
- Automatic Product Speed Following (APSF) to reliably place labels at variable conveyor speeds
- Dispensing speed of up to 25 m/min
- Large variety of dispensing edges to apply labels to products of any shape, no matter if sideways, on top or bottom of the product
- Standard interfaces and data connections, such as Ethernet, to ensure an easy communication with production line control
- Easy to integrate into a unit in your existing system
